SYSTEM REPORTING
Unparalleled Business Intelligence

Transform Data into Actionable Insights

Harness the power of your data through an integrated suite of reporting and dashboards.

Advantzware's visual analytics platform, combined with our best-in-class software, provide actionable insights and real-time analytics across the organization.

MANAGEMENT DASHBOARDS

Management Dashboards display a variety of visuals whereby management can see daily, monthly, and yearly bookings and invoicing, by customer and sales representative. The graphics quickly illustrate percentages and size of the pie rather than straining over numbers.

PERSONNEL DASHBOARDS

Plant personnel can see visuals of machine efficiencies by machine by day, month, and year.

ADVANTZWARE OPEN ANALYTICS (AOA)

The Advantzware Open Analytics module takes our reporting to a higher level. This module allows you to create custom reports or designate standard reports in your preferred format, schedule them to run at a certain time of day and be emailed automatically to a group of people that you designate. Use this module to create dynamic dashboards of information in graphical format. Reports can be output and sent in standard formats such as PDF, Excel, CSV or XML.
