INTERACTIVE VIEWS, VISIBLE EVERYWHERE THROUGH MOBILE ACCESS.

Discover what WinSPC Envision™ can do for you

Access your WinSPC data through the Envision web portal on any device. Move quickly from dashboard-style summaries to statistical analysis and quality performance measures using simple, pre-configured views of your remote systems.

WinSPC ENVISION

See Your SPC Data in New Ways

Designed to provide you with complete access to your WinSPC data wherever you may be. WinSPC Envision is a web-based application that delivers overviews and interactive single-click access to supporting data and statistics. This added visibility allows you to quickly view and compare quality metrics throughout your organization or to review data related to critical issues at distant locations.

Capabilities & Benefits

- Interactive summaries, visualizations and charts permit you to sort and rank data with ease.
- Advanced filtering options allow you to focus on just the data of highest importance or to dive further into the relationships underlying WinSPC events occurring far away.
- WinSPC Envision puts more information at your fingertips, even when you are away from your desk or facility, no matter what device you may have available.

Dashboard summaries

Designed for mobility

Extending your visibility

Available on-demand

A POWERFUL WINDOW INTO YOUR SPC DATA

Mobility

Stay connected to critical processes while on the road, or review alarms and violations without leaving a meeting. WinSPC Envision permits access to all of your WinSPC data no matter where work takes you.

Stay connected anytime

With almost any device

Receive, review and respond

Mobile optimized experience

Visibility

Viewing and responding to events from remote processes has never been easier. Access any WinSPC server by making a selection in a single drop down menu. Quickly navigate among these to evaluate and compare production processes throughout your organization or supply chain.

Remote production views

Capability and performance summaries

Supply chain monitoring

Site-to-site access from any available device

Interactivity

WinSPC Envision enables single touch access to deeper views of production from wherever you happen to be. Perform multi-level drill-downs to review the supporting data underlying events and notifications, or to review configuration details about items in production.

Review control conditions

Review setup parameters for parts and processes

Review data, control charts and normality

Drill-down into violations, assignable causes and corrective actions

- MS SQL Server

- Oracle SQL Server

Server Requirements

Windows Server 2008 or higher

32bit and 64bit editions

1GB available server drive space

SMTP mail server access

ODBC database drivers

How to Buy WinSPC Envision

WinSPC Envision is currently being offered at a special introductory price. To receive a product demonstration and a quotation, please contact a sales consultant by calling **248-357-2200** or email sales at **sales@winspc.com**.

WinSPC Envision pre-configured views include

- **Parts in Production Overview** – A single view containing four interactive visualizations describes the state of your production environment while also permitting review of underlying part details.
- **Process Overview** – A tabular summary of key process statistics reflects your priorities through sorting options and permits drill-downs to expose more performance detail.
- **Violation Overview** – Three interactive visualizations present recent violations, permit organization by Pareto and support drill-downs to explore the details behind alarms.
- **Chart Matrix** – A color-coded multi-chart grid presents the performance of all processes of interest, while permitting a deeper dive when an incident or notification catches your interest.
- **Administrator Tree View** – A familiar tree-view presents quick access to WinSPC setup information and common quality reports.
